

National Center for Health Research

Cancer Prevention and Treatment Fund

Making a
Measurable and Meaningful
Difference in 2020-2021
CFC #11967

***Designated as one of America's Best Charities by Independent Charities of America,
98 cents of every dollar will pay for programs, much higher than most charities!***

What We Do

▶ We're fighting laws that would increase the cost and decrease the safety and effectiveness of medical products used by millions of Americans.

▶ We protect 82 million families by fighting big oil and chemical companies, resulting in the removal of cancer-causing BPA, phthalates, and other chemicals from children's toys, baby bottles, mattresses, artificial turf, and playgrounds.

▶ We provide free help to tens of thousands of individual patients and their families through our hotline and personalized assistance.

▶ We are featured in *The New York Times*, *The Washington Post*, *Wall Street Journal*, *Bloomberg News*, *Chicago Tribune*, and on *Fox News*, *NBC*, *NPR*, *CNN*, *ABC*, and *CBS* on medical breakthroughs and helping correct medical misinformation. This helps us inform millions of Americans about important issues that affect their lives.

▶ We're here for you. We're here in person, in a real office with experts on staff who can help you (except when pandemic restrictions make that impossible), and we are always available to help on the phone, on our website, and through email. Contact us at info@center4research.org.

How We Help

"My mother died from the side effects of her cancer treatment. Years later, the medication was taken off the market. We all want new medical treatments to be available as soon as possible, but only after being proven safe and effective. Can you help me figure out which medications are proven to safely help patients live longer?"

"My healthy young daughter died from complications from her contraceptive. With so many birth control options on the market, why are more dangerous one still being prescribed? And why aren't doctors telling their patients which ones are safest for them?"

"My Dad's memory is deteriorating. Are there dietary supplements that can help? Are there puzzles or physical exercises that will help delay memory problems?"

These are the kind of heartbreaking requests we get through our hotline. We assist each person individually, helping them to choose the best treatment, to help other families, or to notify opinion leaders and the media about harmful medical products.

Well-known self-help author Harriet Lerner said it best:

"When I was diagnosed with cancer, you were like a life preserver that I could grab on to. You're a nonprofit that wasn't selling me anything and that presented objective facts and up-to-date research without pressuring me to do one thing or another. The written materials were easy to read and understand—and free!

"I also had the chance to talk to a great person on the phone (also free) who didn't overload the circuits by giving me too much information. She was obviously up on the latest research findings, and I learned new facts that were pivotal in my decision making.

"Thanks to you, I'm doing great! I'm so grateful."

We can't be bought.

We accept NO funding from drug companies or other sources that could influence our work or compromise our integrity.

Gifts can be made easily online, in the mail, or give us a call and we can assist you over the phone.

Help us make a measurable difference!

Your donation makes a difference by ensuring that we're here for you and your loved ones. Donations pay for essential services, not huge CEO salaries.

Supports our online health hotline for 5 patients

\$65

Helps 100 patients by providing free medical information

\$260

Helps us fight for laws to reduce the cost of urgently needed medications

\$1,000

Supports internships or fellowships in your name or the name of a loved one

\$2,500

We have a small staff and our budget is a small fraction of many charities'. How do we accomplish so much?

- **Our exceptional staff provide free help to millions of patients and consumers.** Our assistance is always free, on our website (www.center4research.org), and in our personalized responses to people contacting us daily on our online health hotline (info@center4research.org).
- **We train thousands of health professionals, researchers, journalists, and patient advocates** through free courses and training. We don't accept money from companies making medical products—that's why we are such an important source of objective information for doctors and nurses.
- **We educate** current and future leaders on complicated medical issues. We work with nationally respected researchers to explain their research findings to those who need them most – patients, family members, policy makers, and health professionals. And our internships and fellowships train tomorrow's leaders.
- **We leverage our power** to strengthen the voices of patients and consumers. We testify and provide expert advice to the FDA, EPA, CDC, VA, the U.S. Congress, and state and city governments. We are a leader in the Patient, Consumer, and Public Health Coalition, which represents more than 7 million people who want to urge policy makers to ensure the safety and effectiveness of medical treatments for all Americans.
- **We're in the news**, interviewed on all major media, reaching opinion leaders and Americans from all walks of life. Reporters contact us every week, asking us to explain the latest research on medical issues that affect all our lives. This enables us to reach most Americans, so they can keep their loved ones healthy.

A few of our goals :

- ◆ **Make prescription drugs affordable and make sure there is clear evidence of safety and effectiveness!** Why should Americans pay more than any other country for exactly the same medications for cancer, heart disease, or any other treatments?
- ◆ **Protect our nation's 74 million children** by removing carcinogens and other dangerous chemicals and metals from children's playgrounds and athletic fields. Require playgrounds to be proven safe based on objective scientific studies!
- ◆ **Ensure that medications taken by people over 55 are tested on people over 55.** Most medications are tested on younger patients, who metabolize drugs differently. Testing patients over 55 will improve treatments for more than 70 million Americans.
- ◆ **Improve cancer treatments.** The latest research shows that too many Americans are spending their life savings on cancer treatments that are not more effective for them than less expensive FDA-approved treatments. Recent studies indicate that immunotherapy helps shrink tumors for fewer than 8% of cancer patients. The studies did not evaluate whether any patients live longer. We are making sure that patients and physicians have that crucial information.

Help us achieve our goals
